Flag: Follow up

Hi Mike,

As I mentioned during the OPP Weekly, Rick is planning to give program updates at the Region 7/8 and State Departments of Agriculture Meeting on December 17. Are there any specific issues that would be of interest to the states (Iowa, Kansas, Missouri, Nebraska)?

Also, Dicamba, M-44 and Hemp are among the topics, he plans to discuss. I pulled out these RD-specific topics from his deck and added them to the attached slides for your review. Can you take a look to ensure that I have the latest updates.

I also have a few question below on the slides:

-M-44 (slides 4-5) Looks like this will go out this week. Slides 4-5 were taken from comms. Just wanted to confirm that you're ok with the info?

-Dicamba roundtable/update (slides 7-13) – Slides 7-13 were used in Rick's Region 7/8 presentation last year. To provide updates, can I add slides 52-54, 58 from the attached Dicamba Briefing deck after slide 13 in Rick's deck? I know some of the info in the Dicamba briefing deck was intended to be internal, so just wondering if slides 61-63 are considered sensitive, internal info. If so, can we tweak them for Ricks slides? If not, can I use them as well as updates?

-Hemp (slides 15-20) – Looks like the hemp biopesticides registration announcement may go the week of December 16th. Is that correct? Although I think I heard at the OPP Weekly this morning that there is a denial. I've copied Bob and Anne for input.

I'd appreciate any input/updates you can provide. Thanks.
